

Divestment proposals
Bonita Lawrence to: Judy Horwood

02/07/2017 03:53 PM

I am strongly in support of the two divestment proposals. Both are intensively researched, and so I trust their findings. As a university, we should be a leader in creating a safer world where global warming is halted. I believe that York should divest from the arms industry, per the first proposal, since the arms industry by definition finds war to be lucrative. Secondly, the overwhelming evidence (despite the recent American administration's denials) that catastrophic levels of global warming are going to happen unless we curtail the use of fossil fuels drastically leads me to support the second proposal, to divest from fossil fuel corporations.

If you have further questions, please email me.

Sincerely,

Bonita Lawrence
