Good Morning,

I do not believe that York University should accept either of these two proposals. The university should invest in products and companies who will bring us the highest yields and leave the politics out of it. I vote NO. Besides the divestment of weapons is directly aiming an anti-Israel message and I do not support their message.

Subject: [YUSAPUY-L] Proposals Related to Responsible Investment
Sent by: YusApuY membership announcements <YUSAPUY-L@YORKU.CA>

Message sent on behalf of Irene Henriques, Chair, YUACRI

The York University Committee on Responsible Investing (YUACRI) has received two proposals from the York Community related to responsible investment. One proposal submitted is related to the divestment of weapons and the second proposal is on the divestment of fossil fuels.

The Committee requests input from the York Community on these two proposals. They can be located through the following link: <http://yuacri.info.yorku.ca/proposals-submitted/>. All comments should be provided in writing to jhorwood@yorku.ca.
